

## Inko Lorch – Co-Founder & CTO

Inko Lorch is Co-Founder and Chief Technology Officer at bugshell. He has been fascinated by cyber security already at a very young age. For him, his passion has turned from a hobby into a profession. Even as a teenager he was fascinated by networks and IT systems, and he has always been concerned with security mechanisms and data leaks. After graduating with a Master of Science Enterprise and IT Security, he held positions at SEC Consult Unternehmensberatung as well as Cobalt.io, where he worked as IT Security Consultant, Security

Researcher, and Core Lead, respectively. His vision is to drive the evolution of IT security and transform the dusty reporting process of pentesting.

### Short summary:

Inko Lorch is Co-Founder & Chief Technology Officer of bugshell. Together with his founding team, he wants to make IT penetration testing more efficient, transparent and understandable by using a platform approach.
